Interprofessional Learning, Experience and Practice

Exemplar IPE Program at Case Western Reserve
University /Cleveland Clinic Health Education Campus

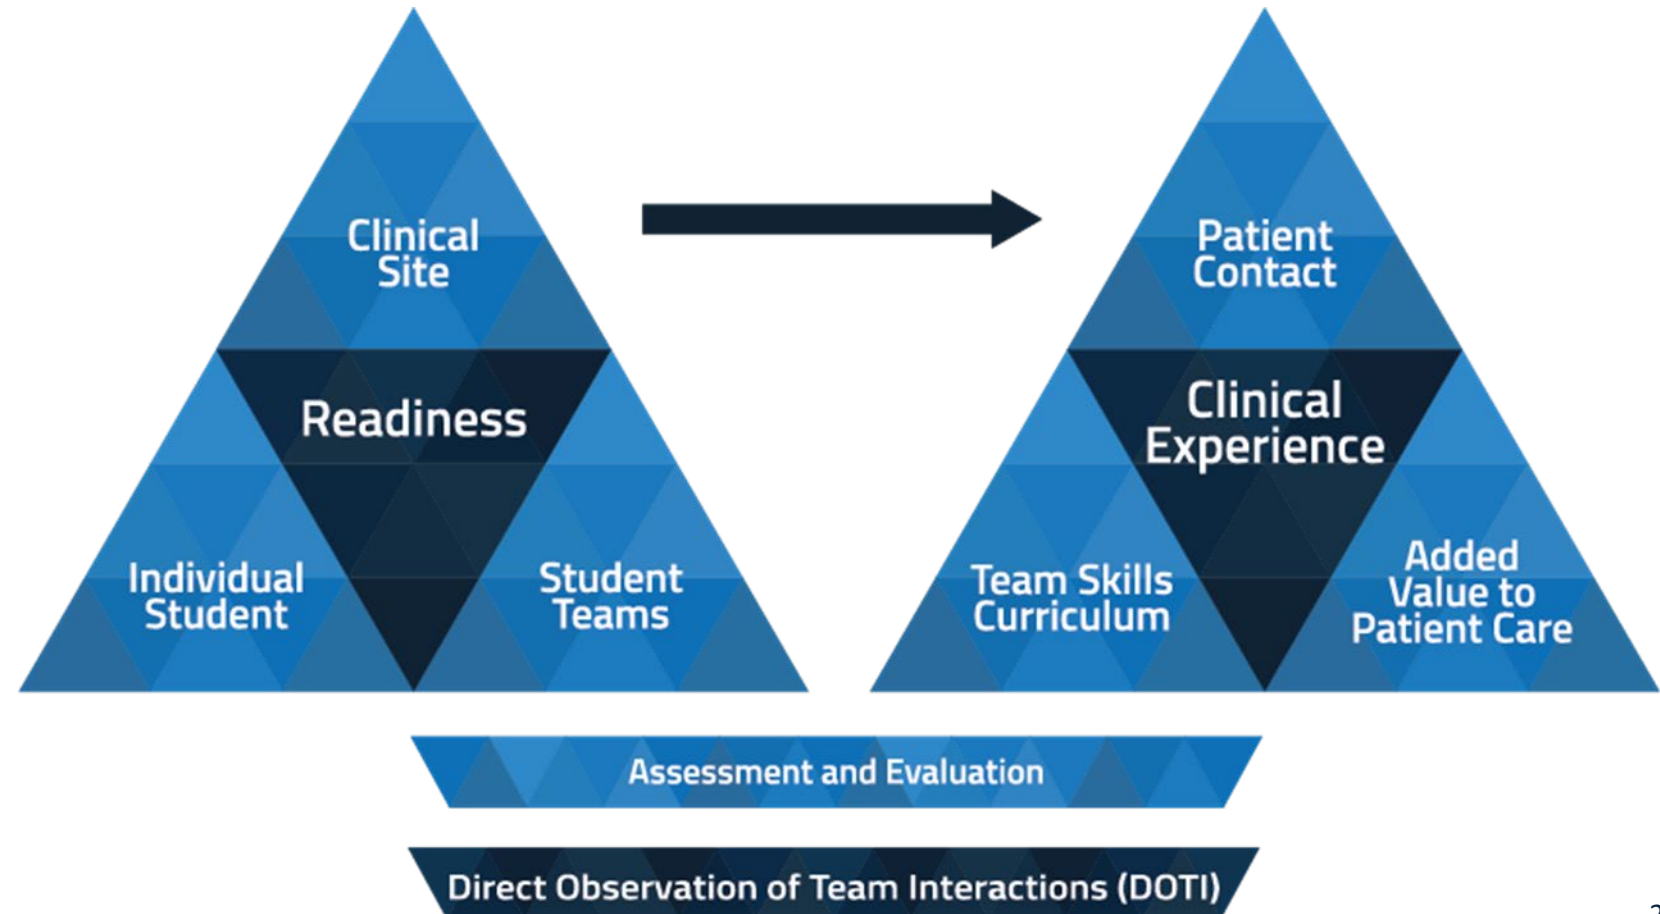

The Need for a Comprehensive IPE Model

Strengthen the link between learning and assessment

Connect foundational training with clinical experiences

Develop collaborative care team skills through a practice-based experience

Overview of Assessment and Evaluation

Mixed Methods

- Quantitative
- Qualitative
- Self-Report
- Direct Observation(DOTI)

Multi-Level

- Students
- Student teams
- Faculty/coaches
- Site

Process/Outputs: Numbers of Participants, Stakeholder Satisfaction

Outcomes: Short-Term; Knowledge, Attitudes, DOTI Skills, Self-Report Behaviors

Impact: Value Added, Site Capacity, Patient Health (Long-Term)

What is DOTI?

Direct Observation of Team Interactions

TASK COMMUNICATION			
	Low		High
REFLECTIVE LISTENING	Team tolerates members interrupting, side conversations or members ignoring each other.	1 2 3 4 5 NA	The team expects members to listen without interruption and be attentive to whomever is speaking. Members demonstrate listening by asking questions or participating; nonverbal cues, eye contact, body language.
TEAM DIALOGUE / ENGAGEMENT	The team ignores poor participation by members; tolerates withdrawal from discussions.	1 2 3 4 5 NA	The team expects and supports all of its members to engage in meaningful discussion. All members participate in discussions and are engaged in dialogue.
INFORMATION SHARING	Team permits members to <u>not</u> share information that is clear, relevant or timely. Members do not explain professional terminology.	1 2 3 4 5 NA	Team insists on members sharing appropriate information that is clear, sufficient, organized and relevant. Members check for understanding; practice SBAR or similar process.
COLLABORATIVE DECISION-MAKING	Team tolerates unilateral decision-making. The problem-solving and decision processes are not inclusive; different opinions <u>are not sought</u> or are ignored.	1 2 3 4 5 NA	Team seeks input and considers <u>all perspectives</u> in the decision-making process. Final decisions are a synthesis of ideas, perspectives and expertise.
ROLES and LEADERSHIP			
ROLES & RESPONSIBILITIES	Team roles and responsibilities <u>are not used, discussed, or understood</u> . Members do not contribute their own knowledge or skills and ignore expertise and skills of other members.	1 2 3 4 5 NA	Team <u>utilizes</u> the roles of all its members; team verbally recognizes abilities and contributions from all members; team recognizes its own limitations. Members understand roles and responsibilities of others.
MUTUAL SUPPORT	Team tolerates poor performance due to lack of support of each other. Members do not provide support or assist each other when it <u>is needed</u> to accomplish the work.	1 2 3 4 5 NA	Team encourages its members to support, assist each other or ask for help; team identifies ways to compensate when members are overwhelmed; supports team focus.
LEADERSHIP	Team does not share leadership. Members are uncooperative with other's leadership. One member who limits discussion by imposing opinion often dominates team.	1 2 3 4 5 NA	Team demonstrates leadership appropriate for situation; members cooperate with shared leadership. Leader facilitates consensus and problem solving; provides statements of direction and empowers others; facilitates team focus.

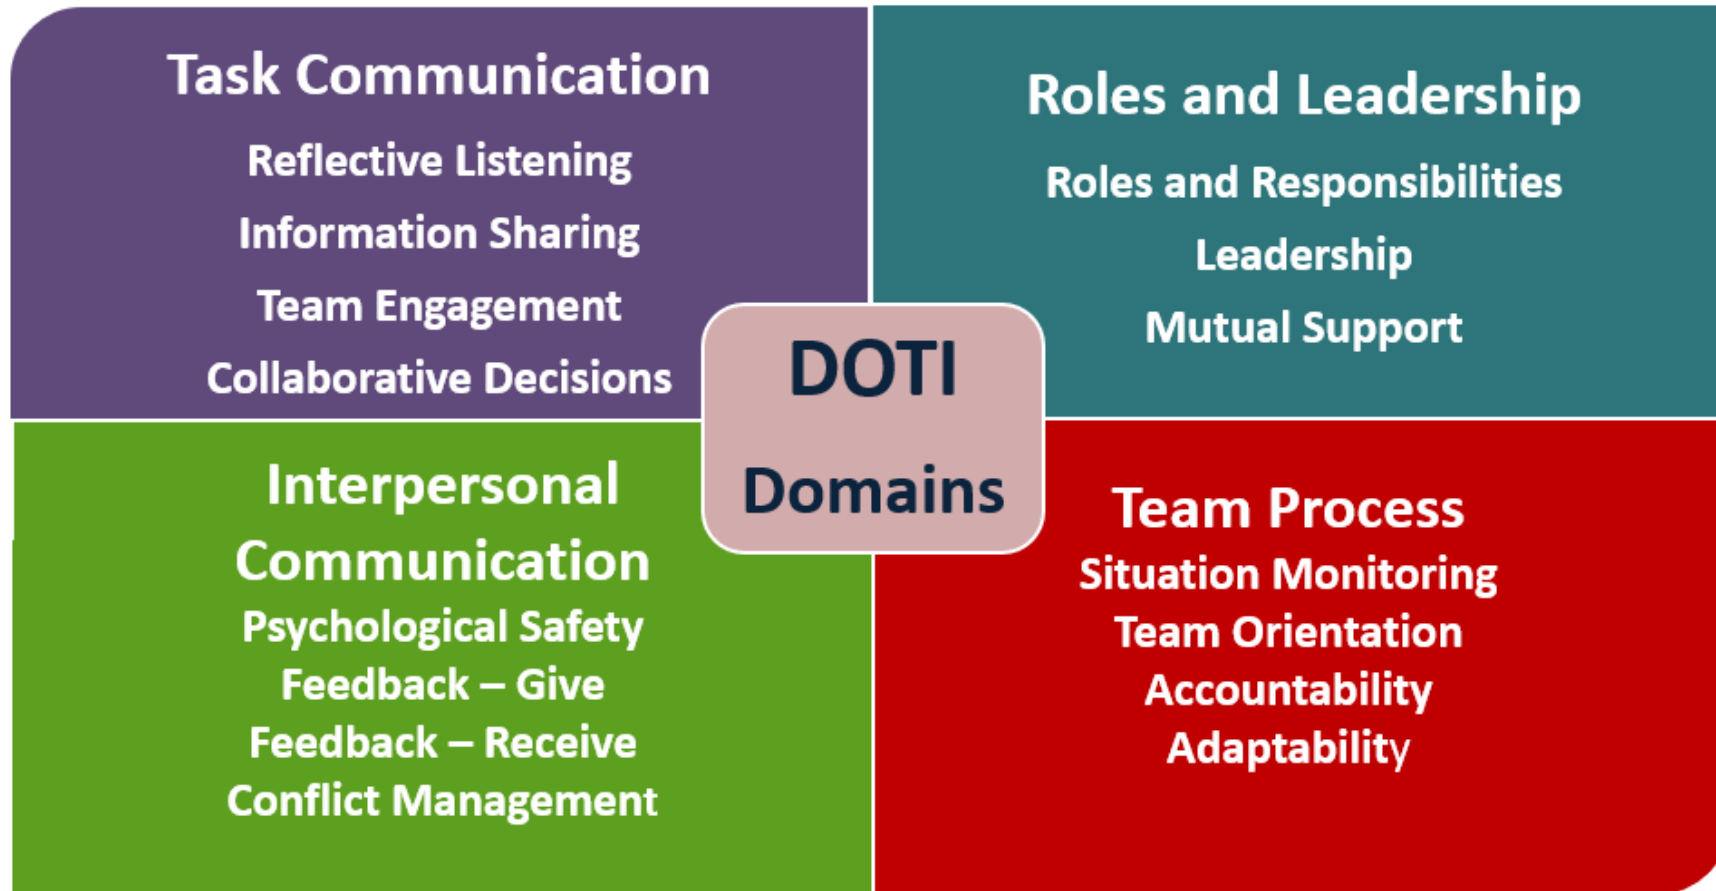

2016-2020 ILEAP Project Toolkit and Guide
Developed at Case Western Reserve University with support from the Josiah Macy Jr. Foundation

15 Observable Team Skills in 4 Domains
Based on IPEC Competencies

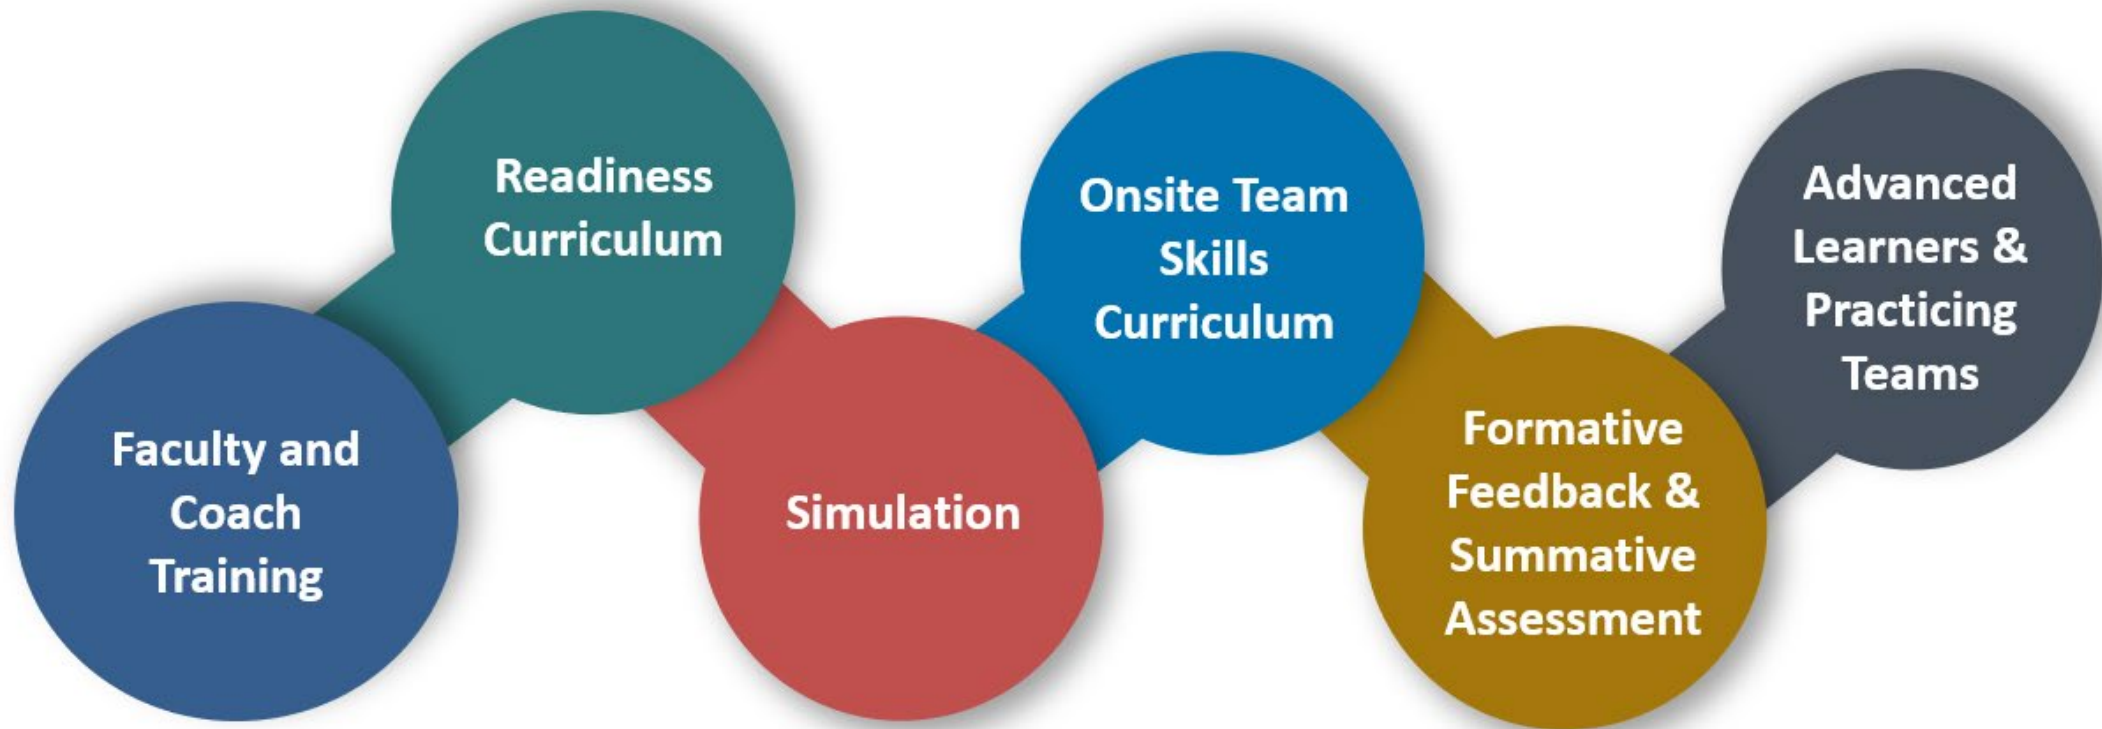

Anchor Definitions and Criteria
Granular Behaviors for Team Development
Supports Individual and Team Skills

Distinguishes High versus Low Team Performance
Captures Change

DOTI Domains and Behaviors

DOTI Connects Training with Assessment

DOTI in Assessment

Formative

Team self-assessment
Coach provides feedback

Summative

Team assessment
Observation on-site
Observation in simulation
Individual assessment
Identify/correct DOTI behaviors

Supports reflective learning

Detects differences in skill performance between teams

Compares team with observer assessment

Detects change in skill performance over time

Clinic or Simulation Example

Health Maintenance Screening

The ILEAP Team
